Animal Observation Diary

BY TIANSHUO ZHAO

WHAT YOU CAN DO ON THIS DAILY

Record observations of animals

In this diary, you can record the time, place, weather, food and plants around the "Schrödinger's Box", what kind of animals it attracts, the number of animals, their characteristics, activities, etc. You can also record your favorite animals, such as the number of animals in the "Schrödinger's Box" and the number of animals in the "Schrödinger's Box"!

Summarize and Reflect

At the end of each observation, it is useful to summarize their observations and think about why the animal exhibited a particular behavior.

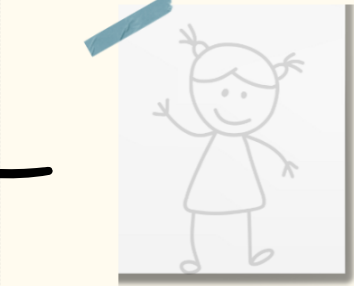

HOW TO USE THIS DIARY

What you're holding in your hands is really quite special: you can read it like an ordinary diary book, but you can also open out the pages to make them much bigger! This way you can write down more information and details better.

You can paste photos here!

PLANT COLLECTIONS

WHY

What observed animals choose to appear in this area and pick up this "Schrödinger's box"

Is there another animal living around here?

What kind of plant is around here?

How do they adapt to environmental changes?

where is the food coming from?

How do they survive in the city?

HOW TO PROTECT THIS WILDLIFE?
